

## Measuring The Kitchen Unit

### MEASURING THE UNIT

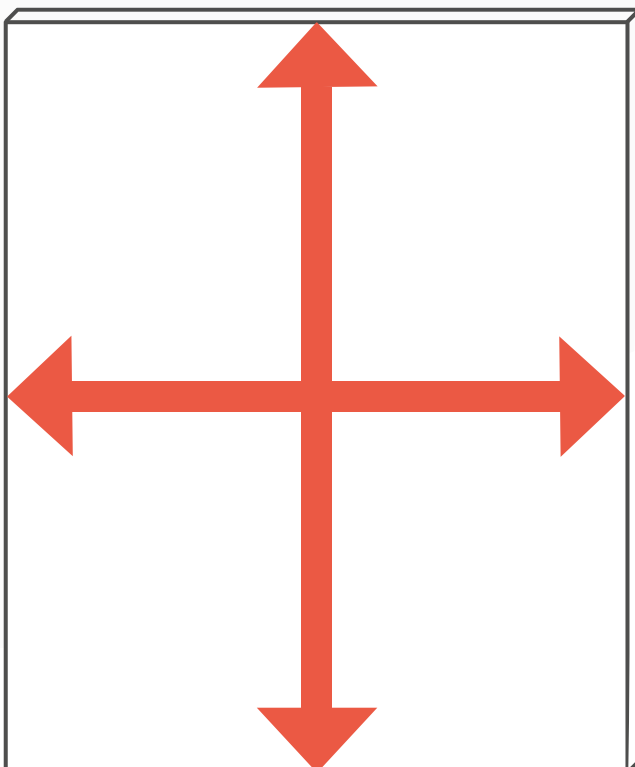

Start by measuring the Unit from edge to edge for the height and the width. You will then need to minus a tolerance so the door can open.

Take 5mm off the height of the unit, and 4mm off the width of the unit, this will leave you with your door measurement.

### STANDARD DOOR SIZES

For example if the unit measurement is 720x600mm, the door size will be 715x596mm

## Measuring The Back Of A Door

### USEFUL TIP

Always measure the back of the door

### STANDARD DOOR SIZES

Heights	Widths
140mm	146mm
175mm	296mm
283mm	396mm
355mm	446mm
450mm	496mm
570mm	596mm
715mm	796mm
895mm	896mm
900mm	996mm
1055mm	
1245mm	
2155mm
